DISTELL (30.9% effective interest)

- The results were negatively impacted by:
 - › a stronger rand, particularly against the British pound;
 - › intense competition; and
 - › pressure on consumers

UNILEVER SA (25.8% effective interest)

R'million	Six months Dec 2016	Six months Dec 2015	% change
Headline earnings	1 020	1 191	(14.4)

- The main reasons for the decrease in headline earnings were due to:
 - › a higher effective tax rate resulting from lower tax allowances following the completion of manufacturing investments; and
 - › a tough competitive environment experienced in the consumer market

RCL FOODS (77.3% effective interest)

- RCL Foods' comparative results were positively impacted by the release of a R163 million provision raised for uncertain tax disputes as part of the Foodcorp acquisition
- Excluding this, RCL Foods' contribution to headline earnings would have decreased by 29.0%, mainly due to:
 - › lower contribution from the Chicken business as a result of massive oversupply in the local market caused by high levels of local production and dumping of chicken imports; offset by
 - › a strong Sugar business performance which benefitted from price increases that countered reduced volumes

R'million	Headline earnings			Intrinsic value		
	Six months Dec 2016	Six months Dec 2015	% change	As at 31/12/2016	As at 30/06/2016	% change

Total	1 580	1 386	14.0	38 079	32 213	18.2

- FirstRand and RMBH reported normalised earnings growth of 6.7% and 6.4%, respectively, mainly due to:
 - › growth in both net interest income and non-interest revenue from FNB, RMB and Wesbank; partly offset by
 - › an increase in credit impairment charges
- Remgro's effective interest in FirstRand is 13.5% (June 2016: 13.5%)

	Six months Dec 2016	Six months Dec 2015	% change	As at 31/12/2016	As at 30/06/2016	% change
Mediclinic	983	787	24.9	42 690	69 691	(38.7)

- The increase in Mediclinic's contribution to headline earnings is mainly due to:
 - › Remgro's increased interest in Mediclinic from 42.1% to 44.6%;
 - › inclusion of the results of Al Noor and Spire Healthcare Group;
 - › a strong performance in Switzerland; and
 - › good organic growth in Southern Africa
- This is partly offset by the underperforming Middle East business, which was impacted by operational and regulatory factors
- The decrease in intrinsic value is due to a decrease in the Mediclinic share price on:
 - › the JSE from R211.53 on 30 June 2016 to R130.00 on 31 December 2016
 - › the LSE from £10.95 on 30 June 2016 to £7.71 on 31 December 2016

R'million	Six months Dec 2016	Six months Dec 2015	% change
Profit/(loss) attributable to equity holders	383	(1 023)	137.4

- The increase in earnings was mainly as a result of positive fair value adjustments on its investment in Exxaro (R320 million), AECl (R64 million) and Aveng (R43 million), versus negative fair value adjustments on Exxaro and MMI preference shares in the comparative period
- Income from equity accounted investments decreased to R57 million (2015: R245 million) partly due to the disposal of Idwala as well as significantly lower contributions from other associates due to difficult macro-economic conditions

- The headline loss is the result of the continuation of weak commodity markets and low dry-bulk shipping rates

SEACOM (30.0% effective interest)

- In terms of the agreement between SEACOM's shareholders, limited financial disclosure is allowed
- The headline loss of R18 million (2015: headline loss of R28 million) is mainly due to a change in the estimated useful life of the network assets in 2015 and the resulting normalisation of the depreciation charge in 2016
